CAREER OBJECTIVE

Final-year B.Tech CSE student with strong Java 8 ,fundamentals OOP, Collections, Exception Handling and web development skills in HTML 5, CSS 3, and JavaScript. Seeking a System Engineer role to apply my technical and problem-solving skills in delivering reliable software solutions.

EDUCATION

B.Tech in Computer Science and Engineering | MRECW, Hyderabad | Expected 2027 | CGPA: 8.6

Diploma in Pallavi Engineering College | 2024 | Percentage: 86%

TECHNICAL SKILLS

Languages: Java 8, JavaScript

Web: HTML5, CSS3

Concepts: OOP, Data Structures & Algorithms, Collections, Exception Handling

Tools: GitHub, VS Code

PROJECTS

Code Mentor | Java, HTML, CSS, JavaScript | [CodeMentor](#)

- An interactive coding-learning platform designed to help beginners learn programming concepts and practice coding problems.
- Built core learning and problem-solving features using Java, HTML, CSS, and JavaScript, including coding exercises and structured topic-based learning.
- Developed a responsive and user-friendly interface for practicing programming concepts and improving problem-solving skills.

AI Video Fact Checker | React.js, Flask, Python, JavaScript | [AI Powered video fact checker](#)

- An AI-powered web application that analyses social-media videos to help users identify misleading or potentially false information.
- Built a React.js frontend and Flask backend with video upload, processing, transcription, and fact-verification workflow.
- Implemented AI-based analysis to provide authenticity results, supporting information, source/original-video details, and risk-related insights.
